

## Graduate Java Software Development Engineer at Intergral GmbH

Intergral is a leading application intelligence company. Our flagship product, FusionReactor, provides real-time visibility and alerting of application performance issues. Thousands of customers trust FusionReactor to monitor their applications, enabling them to identify and respond faster to performance and stability problems.

Our engineers develop and deliver the next generation of Application Performance Management and DevOps tools, used by thousands of customers worldwide.

Your days can be extremely varied from developing new features for the next release to working on defects for a bleeding edge SaaS service. We use Java, NodeJS, Python, Angular, MongoDB, Cassandra, Kafka, Redis, AWS, Docker, Jira, Slack, Git and many other popular technologies. You will have the opportunity to work closely with experienced people who are smart and passionate about the products that we build.

### Responsibilities include, but are not limited to:

- Designing and developing cloud based solutions using the latest technologies.
- Programming using modern languages and software products.
- Designing and writing automated tests.
- Defining product objectives by analyzing user requirements; envisioning features and functionality.
- Designing database/NoSQL data architecture.
- Product development in an Agile SCRUM team
- Troubleshooting development and production problems across multiple environments
- Supporting users by developing documentation and assistance tools.
- Skills development by researching new technologies and software products; participating in educational opportunities; reading professional publications; maintaining personal networks; participating in professional organizations.

### Profile:

- Motivated and driven developer with an interest in developing advanced software solutions
- Good design skills & the ability to turn a technical solution into a user friendly product
- A great willingness to try new things / ideas together with a steep learning curve
- Excellent team player with good verbal and written communication skills
- Willingness to travel and to spend short periods of time away from home on occasion

### Qualified candidate will have:

- Computing / IT related Bachelor's degree or equivalent
- A strong technical background – passion for software development
- Excellent knowledge and experience with OO Design and Java programming
- Strong analytical skills
- Good knowledge and experience with the technologies such as: MongoDB, NoSQL, JSON, Cassandra, Redis, Maven, Docker, IDE's.
- Strong testing skills and experience with automated testing tools and environments
- Understanding of Software as a Service (SaaS)
- Strong written and spoken English
